Digital transformation serves as a critical catalyst for economic empowerment and the enhancement of individual livelihoods. By integrating digital tools into economic activities, societies can unlock new pathways for income generation and sustainable growth, directly contributing to the global agenda for poverty reduction. As noted in the Global Digital Compact, “Digital technologies are dramatically transforming our world. They offer immense potential benefits for the well-being and advancement of people and societies and for our planet. They hold out the promise of accelerating the achievement of the Sustainable Development Goals.” To realize these benefits, it is essential to bridge the digital divide and provide individuals with the necessary resources and skills to participate fully in the modern economy.

Ensuring that digital dividends are equitably distributed requires a robust and collaborative ecosystem. This initiative focuses on leveraging technology to improve economic outcomes, emphasizing the importance of inclusive access to digital marketplaces and financial services. This approach aligns with the principle that “Governments, the private sector, civil society, the technical community, academia and international and regional organizations, in their respective roles and responsibilities, are essential to advance an inclusive, open, safe and secure digital future. Our cooperation will be multi-stakeholder and harness the contributions of all.” By fostering an environment conducive to digital entrepreneurship and secure online participation, the project aims to translate digital connectivity into tangible economic security for target populations.

*   Harnessing digital technologies to accelerate the Sustainable Development Goals and improve human well-being. *   Advancing inclusive digital transformation to promote economic empowerment and income generation. *   Strengthening multi-stakeholder cooperation to build an open and secure digital future for all. *   Closing digital divides to ensure equitable participation in the global digital economy.

Selected Global Digital Compact Alignments

Trust, Safety, & Integrity › Multi-Stakeholder & Global Cooperation

“Governments, the private sector, civil society, the technical community, academia and international and regional organizations, in their respective roles and responsibilities, are essential to advance an inclusive, open, safe and secure digital future. Our cooperation will be multi-stakeholder and harness the contributions of all.” (GDC, p. 8k)

Ratified Global Principle

Digital Infrastructure & Governance › International & Multilateral Engagement

“Digital technologies are dramatically transforming our world. They offer immense potential benefits for the well-being and advancement of people and societies and for our planet. They hold out the promise of accelerating the achievement of the Sustainable Development Goals.” (GDC, p. 1)

Ratified Global Principle

Digital Infrastructure & Governance › International & Multilateral Engagement

“We recognize the urgent need for strengthened data governance cooperation at all levels with the effective, equitable and meaningful participation of all countries and in consultation with relevant stakeholders to unlock the full potential of digital and emerging technologies. We recognize that this will require capacity-building for developing countries and the development and implementation of data governance frameworks at all levels that maximize the benefits of data use while protecting privacy and securing data. We call on the United Nations system to play a role in promoting capacity-building for responsible and interoperable data governance.” (GDC, p. 38)
